

## **A new initiative in the Fund for Bilateral Relations**

On November 20, 2020, the Health Programme Cooperation Committee adopted for its implementation a pre-defined initiative titled "Reducing health disparity in immunization programs and prudent use of antibiotics in polish outpatient health care".

The new initiative is financed by the EEA and Norway Grants under the Fund for Bilateral Relations. The project implementation was entrusted to the Foundation Institute of Infection Prevention in partnership with the Norwegian Directorate of Health and the Norwegian Institute of Public Health.

The official transfer of funds will take place after signing the contract. Then we will also provide more information about the project.
